Arachne Digital in London – Let's Meet!

Our co-founder, Kade Morton, will be in London next week and is keen to connect with cybersecurity professionals, researchers, and open-source enthusiasts. If you're working in threat intelligence, OSINT, or security operations, this is a great chance to chat about our work in open-source threat intelligence.

Jenine Carron, Arachne Digital's lead developer, is based in London and available to meet anytime. Whether you want to discuss CTI, open-source tooling, or the latest in threat-informed defense, we'd love to hear from you.

If you're in London and interested in catching up, reach out!

#CyberThreatIntelligence #OSINT #ThreatIntel #OpenSource

Arachne Digital

We advance global cybersecurity knowledge and empower organisations with bespoke consulting, our open-source tool, Thread, and access to our threat intelligence database.

Forked from searx/searx

Thread

It is an open-source cyber security initiative dedicated to enhancing **cyber threat intelligence (CTI) mapping**.

It does this by automating the process of linking cyber security reports and articles to the MITRE ATT&CK® database for identification.

This is the video recording of Arachne Digital's second virtual community event held on Saturday, 23rd November.

In this video, you will:

- Understand use cases for Thread, an open-source cyber threat intelligence tool
- Learn how to download Thread from GitHub & login to the Thread online
- Get started with using Thread and joining the community

17:59 Thread online application walkthrough with co-founder Kade Morton
41:20 Thread download from Github with co-founder Jenine Carron

#124 · KadeMorton opened on Aug 28, 2024									

Thread

- DISARM implementation
- UX/UI overhaul
- Indicators of compromise to be added to the PDF report generated by Thread

Tracery

- Audit the codebase and dependencies for any memory unsafe code
- Migrate any elements found to memory safe languages
- Build a maintenance process for supported search engines

Get familiar with our Code of Conduct & Contribution guidelines

This screenshot shows a GitHub repository page for the file 'community / CODE_OF_CONDUCT.md' by user KadeMorton. The file was created 6 months ago and is 6.38 KB in size. The page displays the 'Contributor Covenant Code of Conduct' document. It includes a section titled 'The Arachne Digital Community' which states the community's values and goals. Below this is a list of five principles: Collaboration, Transparency, Innovation, Inclusivity, and Empowerment. The document concludes with an 'Our Pledge' section, which is partially visible at the bottom.

Contributor Covenant Code of Conduct

The Arachne Digital Community

Below are the aspects that we want the Arachne Digital community to be known for.

- **Collaboration:** Reflecting the spirit of open source, collaboration highlights the importance of working together, sharing knowledge, and collectively advancing cybersecurity and cyber threat intelligence (CTI).
- **Transparency:** Promoting open communication, transparency fosters trust within the community. It signifies a commitment to honesty, open decision-making processes, and clear documentation.
- **Innovation:** Embracing innovation underscores the community's drive to continuously improve CTI and cybersecurity practices, encouraging creative problem-solving.
- **Inclusivity:** The culture should be inclusive, welcoming contributions and perspectives from a diverse range of professionals, regardless of their background, experience, or expertise.
- **Empowerment:** The community empowers its members, providing them with the tools, resources, and support needed to help others excel in cybersecurity.

Our Pledge

We as members, contributors, and leaders pledge to make participation in our community a harassment-free experience for everyone, regardless of age, body size, visible or invisible disability, ethnicity, sex characteristics, gender identity and expression, level of experience,

This screenshot shows a GitHub repository page for the file 'KadeMorton Create CONTRIBUTING.md'. The file was created 6 months ago and is 23.3 KB in size. The page displays the 'Contribute to Arachne Digital Projects' document. It includes a section titled 'Project Mission and Summary' which states the mission of Arachne Digital to revolutionize the world of cybersecurity through open-source projects. The document also includes a list of links to various resources and documents related to the project.

Project Mission and Summary

Arachne Digital is committed to revolutionising the world of cybersecurity through our innovative open-source projects. Our mission is to empower cybersecurity professionals, organisations, and analysts globally by providing them with tools that streamline threat intelligence processes, lead to enhanced threat detection, and fortify security postures. We believe in the power of collaboration, community-driven
